I'm amending my review...it is now a 1-star app. Ever since the fortnite update, everything has been horrible. From latency issues in every game to overheating my phone (iPhone XS Max) and overall creating an environment that makes me loathe even having this game anymore. I gave it a chance and put up with some lag issues here and there, and a crappy update to allow for a 2v2 map in a 1v1 game mode but I can no longer tolerate it and playing has become too tiresome. I expected better from the devs given Rocket League has been so great. Don't get me wrong, this is a great game but I find myself far too often disappointed and let down by this game. There are frequent games that become unplayable by either me or my opponent due to the server lagging. In addition to this, they have recently made the 2v2 map a possibility for a 1v1 game mode which is not enjoyable at all. The goals are far too difficult to score in and far too easy to defend. I don't mind if some people wish to play on it, but there should be something to opt out if you don't want to play on it. If you have found yourself in the situation where you need to install Rocket League Sideswipe on your computer you no longer have to worry. We have BlueStacks among us! The best Android emulator that exists and with which you can run almost any game or App of the Android system on your PC. Table of Contents What is BlueStacks? BlueStacks is the most powerful Android system emulator in the market and most famous in the world. At first it could only be installed in windows operating systems, but now we can install and run on systems Windows and Mac without any difficulty. With BlueStacks software we can install Android games and applications on our computer in full screen as if we were running it on a mobile phone. Install Rocket League Sideswipe on your PC If you've come this far, it's because you want to know how to install and play Google Play's Rocket League Sideswipe (Google's official shop). Just follow these steps: At the top you have the Search Engine. Type Rocket League Sideswipe. You give it to look for. The same emulator will take you to Google Play. Look for the game icon. Install the game following the Google play instructions. You can open the game from the same installation window or from a shortcut on the desktop. Before you start playing and only the first time you will be asked if you want to configure the controls. Once configured you can play Rocket League Sideswipe on your PC! [Example images with the game Rocket League Sideswipe.] Install step 1 Install step 2 Install step 3 Install step 4 Install step 5 Install step 6 How to download apps on your computer with BlueStacks If you prefer to see video of the entire process of downloading and installing the program BlueStacks to install juices or apps like Rocket League Sideswipe we leave you is this short tutorial with all the steps to follow. Download now Rocket League Sideswipe on your PC Don't wait any longer and download Rocket League Sideswipe on your computer for free. Install the Android BlueStacks Emulator and enjoy all the Google Play games and applications on your computer. Download Rocket League Sideswipe BlueStacks for PC Home > Games > Sports > Rocket League Sideswipe > PC You will be automatically redirected to the homepage in 30 seconds. You must have heard of Rocket League, the very famous football-racing video game developed and published by Psyonix. Well it seems that there is also a version developed for mobile devices, called Rocket League Sideswipe. You will find the whole original Rocket League universe but with a brand new camera, shorter matches, and hundreds of decorative elements. Challenger, are you ready to dominate the track? contents Gameplay A brand new camera: The well-known third-person camera perspective of the original Rocket League has been replaced by a lateral viewing perspective. This design makes the whole game and actions easier to visualize and allows the player to enjoy the view. Intuitive controls: You will be able to jump, accelerate, and fly with your car. You will feel an incredible feeling of total control of your vehicle. The more you play matches, the more you will hone your control skills, and you will start to feel what it's like to be one with your car. Snatch victory: Even though the controls and the camera are intuitive, you will have to face your opponent, understand how the car and ball physics work, and train both your mind and muscle memory. Various and challenging game modes: The game offers solo or multiplayer game modes to challenge you in different ways. Challenger, come try the 1v1, 2v2, or the hoops mode. Pimp your ride: You will be able to customize various elements and effects of your car, but also of the ball's effects. Hundreds of different customization options await you. Be the highest-ranked: Face other players and compete to be the highest-ranked in the seasonal leaderboard. Even though Rocket League Sideswipe is developed for mobile devices, the graphics are still impressive, with lots of visual and audio feedback to ensure you never miss any action during the match. Do not think you will get cheap graphics as all the shaders have been developed to ensure you still get a superb gaming experience. Duration and game modes As an online multiplayer video game, Rocket League Sideswipe offers several game modes, matches last up to 2 minutes: Duel mode: This is the classic 1v1 match mode. It is an excellent game mode to train yourself, master your tricks and car controls, and hone your skills in competition. You can either play against a random player or with a friend by setting up the matchmaking settings. Doubles mode: This is the famous 2v2 match mode. Get ready for a more challenging, fast-paced, and cooperative game. You can either play with another random player or with a friend. Teamwork is key, drive, score points and climb the ranked leaderboard. Hoops mode: In the Hoops game mode, the goals baskets. You can either play offline or ranked online 2vs2. Age rating © PEGI Rocket League Sideswipe has been rated PEGI 3, so it can be considered suitable for all audiences. How to install the XAPK file on your Android? The steps to follow are as follows: If you have a version lower than Android 8, you may need to authorize the installation from unknown sources (only if you don't already have done it before). You usually find this option in Settings > Security. Disable the Play Protect function through the Play Store options. Download Rocket League Sideswipe on your mobile by clicking the button at the top of this page. Download and install the XAPK Installer. Open the XAPK installer and grant all the necessary access permissions, then it will scan your device, and it should display a list containing all the XAPK files on your device. If the Rocket League file does not appear, then locate the file in your "Downloads" folder and rename it by replacing the ".zip" file extension with the ".xapk" file extension. Finally, select the Rocket League Sideswipe application and follow the installation instructions. Once installed, launch the game and enjoy! Rocket League Sideswipe Contents Gameplay Graphics and sounds Duration and game modes Age rating XAPK file installation Gameplay A brand new camera: The well-known third-person camera perspective of the original Rocket League has been replaced... Manage my push subscriptions Sports Alternative spelling Rocket League Sideswipe-1.0.xapk Rocket League Sideswipe APK is a racing football game for Android phones, developed by Psyonix Studios. In the genre of online racing games combining action, instead of controlling the football players, we will control a racing car, using our ingenuity to shoot the ball against the opponent's net. You can play offline with the AI or play online with friends worldwide. What we already know about this Rocket League game Those who used to love fierce football matches that "players" are supercars in Rocket League can now bring that passion around with a mobile version called Rocket League Sideswipe. It is known that the game will be officially released on iOS and Android and later this year. And before G, we go through the trailer and a series of gameplay images from the company's official website, predict what's new in the mobile version, Rocket League Sideswipe. In Rocket League Sideswipe, players are expected to compete with a new perspective on the field in 1v1 or 2v2 matches. And it goes without saying that the core of this sport and action game is speed. This is also the key to the player's victory. To visualize the game's lightning-fastness, I have to add information that each match only lasts only 2 minutes. Although the developer has modestly emphasized that Rocket League Sideswipe is just a mobile version of Rocket League on PC, it is clear, in terms of quality (and size), Rocket League Sideswipe really can't be underestimated. What's in the Android version of Rocket League? With Rocket League Sideswipe, similar to the original on PC, players can immediately play a real match or go through a "training course" to gradually get used to the game's movements and rules before entering. And whether you are a beginner or an adept player, you will feel free to choose a good "player" for you. Choosing a car, customizing it. This is one of the treasures of "racing" related games like this. And according to what I have experienced with Rocket League on PC, I believe the Sideswipe version will also have an abundance of vehicles and an exciting level of customization that will give you an exciting start before the real match takes place. Enjoy these rare moments of comfort and peace. You will be racing against light time soon. One of the "aggressive" factors that provoke competitiveness and the fascinating element of this series is the arrangement of tournaments and the list of rankings. The way to honor each title "player" achieved is a great reward for the winner and the latecomers' desire. This sense of competition makes the football-car sports arena heat up exponentially, whether you are playing offline or online. And now I'm going to talk about gameplay a bit. It is not clear how many things will be different when it comes to the mobile version. Well, let's talk about my previous experience when playing Rocket League on PC for you to refer to. Once the vehicle has been selected and upgraded and customized, the tournament looks like the dishes available to us quickly, that we can't think of any strategies to play. The biggest advice I want to give to you who are planning to play this game in the future is: The best plan is to have no plan at all. Because of the game's super-fast speed, and every action is unannounced, there is no hint of any hint at all. So just believe in yourself and improvise, don't devise any strategic strategies. This game challenges the ability to turn around and dexterity in situations. When driving a player-car-race, you should take advantage of both accelerating and stepping so that you do not turn too hard nor too slow because the immediate goal is the ball, which has a size much smaller than the "player". Pushing the ball is an initial success. Note that on the field, if like the original, there will be acceleration points. The car coming here is unconditionally revved to catch the ball faster than normal. Through these points, your car is slower a bit. The second note is that the higher the vehicle speed, the stronger the suction power, which means that the opponent has a hard chance of winning the ball from you, and you also have a higher chance of hitting the ball into the opponent's net. However, at high speed, the view will be minimal and quite difficult to navigate. Every time you accelerate, try to keep the steering wheel as balanced as possible. And just like a real grass field, you can control your vehicle to hit the opponent's vehicle to stop the competitor and win the ball for yourself. It's easy to say, but to play before you know how to hit the opponent's car is not easy because they are as modern as us, even faster. The hardest and most challenging of this game is hitting the ball and finally kick to the net. The car does not have a leg as a person, so it is challenging to control the ball. Sometimes I want to get mad because when I go through 90% of the way, I lose the ball myself, but not by anyone. My blood experience is that in the diploma, you try to play as many times as possible when the system training. And, again, if it's as good as the original, you might be able to hit the legendary "header" that bears your name. It's actually the act of having the car leap into the air, thanks to its high momentum and high inertia at the same time to block the ball. Usually, these pushes are to put the ball into the net neatly. After finishing it, it is very tiring, so do not expect to do it continuously for 2 short minutes. I also guarantee that you will love it when witnessing true fiery collisions between cars and balls or between competitor's cars and yours. Each time, there will be brilliant color effects like fireworks appear, feeling extremely excited. You can experience Rocket League Sideswipe soon by downloading the APK file via the links below.
